

Life In A Positive Light!

Former Buffalo AmeriCorps Member Turned Belle Child Care Employee:

“It was a great opportunity! Being a part of Buffalo AmeriCorps made me realize how much work this community needs. I was given a lot of experiences that helped me look at things differently. I have learned the importance of giving kids a safe place to go to be themselves other than their homes. The different community activities like planting trees, cleanups, barbeques even the summer day camp made me want to make the community a better place. Working with different people, including the kids motivated me to better myself and give my son everything. I received my GED at The Belle Center, as well as, my driver’s license through The Portal Program. I love working with the infants at the Day Care, especially because I can bring my son to work with me. My plans for the future are to become a Registered Nurse, but I’m going to begin with getting a Certified Nurse’s Assistant license.”
